

Shubham Laxmikant Miskin

shubhammiskin003@gmail.com — 9371240320 — LinkedIn — GitHub

PROFILE

Data Engineering specialist with deep expertise in building high-performance, scalable data architectures on Microsoft Azure and Databricks. Proficient in designing complex ETL/ELT pipelines using PySpark, Delta Lake, and implementing Medallion Architecture patterns. Strong technical foundation in cloud infrastructure, data modeling, workflow orchestration with Apache Airflow, and CI/CD automation. Focused on delivering production-grade solutions that optimize data processing efficiency and ensure data integrity at scale.

EDUCATION

B.Tech Artificial Intelligence and Data Science

Shivaji University

2023 – 2027

Kolhapur, Maharashtra

Higher Secondary Education

D.B.F. Dayanand College of Arts & Science

2023

Solapur, Maharashtra

TECHNICAL SKILLS

Cloud & Big Data: Microsoft Azure (Data Factory, Synapse Analytics, Data Lake Gen2, Databricks, Virtual Machines, Key Vault), Delta Lake, Lakehouse Architecture.

Programming: Python (Pandas, NumPy), Pyspark, SQL.

Data Engineering: ETL/ELT Pipeline Design, Data Modeling (Star/Snowflake Schema), Data Warehousing, Data Quality Validation, Medallion Architecture (Bronze/Silver/Gold).

Data Orchestration & Workflow: Apache Airflow, Workflow Scheduling, Dependency Management.

DevOps & CI/CD: Docker, Git/GitHub, Azure DevOps, GitHub Actions, CI/CD Pipelines.

Visualization & BI: Power BI, Tableau.

EXPERIENCE

Software Engineering Intern – RNDS ERP Solutions Pvt. Ltd., Solapur

Jan 2026 – Feb 2026 — Solapur

- Worked on ERP software systems, gaining exposure to enterprise application workflows and business processes.
- Utilized SQL for data retrieval, data validation, and handling application data to support development and business requirements.
- Analyzed requirements and collaborated with the development team to understand data-related issues and support technical solutions.

PROJECTS

NYC Green Taxi – End-to-End Azure Data Pipeline

Azure, Databricks, ADF, Delta Lake, Power BI

GitHub Repository

- **Architected a cloud-native Lakehouse** on Azure using **Medallion Architecture** and Agile development practices, implementing CI/CD pipelines via Azure DevOps for automated deployment of data assets.
- **Built parameterized ADF pipelines** with a smart **idempotency check** (Get Metadata + If Condition) and a dynamic **ForEach loop** across 12 months, ingesting Parquet files from the NYC TLC HTTP source with skipped-month tracking.
- **Developed PySpark transformation notebooks** in Azure Databricks performing column renaming, type casting, data quality filtering, derived column generation, and **incremental batch loading** with processed-file tracking into partitioned Delta tables.
- **Secured credentials** using **Azure Key Vault** secret scopes with **Service Principal OAuth2** authentication – zero hardcoded secrets across the pipeline.
- **Designed a dimensional data model (Star Schema)** for trip analytics, establishing fact and dimension tables in the Gold layer to enable efficient BI queries and reporting.
